H. Herrlich, Lilienthal, G.F.R.	

Aims and Scope

This journal is primarily concerned with publishing original research papers of moderate length (at most about 25 printed pages). However, a limited number of carefully selected survey or expository papers will also be included. The mathematical focus of the journal will be that suggested by the title, research in general topology.

It is felt that it is inadvisable to attempt a definitive description of general topology as understood for this journal. Certainly the subject includes the axiomatic, set-theoretic and geometric facets of topology as well as areas of interactions between general topology and other mathematical disciplines, e.g. topological algebra, topological dynamics, functional analysis, category theory, etc.

Since the roles of various aspects of general topology continue to change, the non-specific delineation of topics serves both to permit future new areas to be included and to prevent older areas without significant current or future research from being automatically included.

All rights reserved. No part of this publication may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying or otherwise, without the prior permission of the copyright owner.

A volume will consist of about 320 pages. The subscription price is Dfl. 135.00 per volume, including postage and handling. Individual subscriptions for private use are available at Dfl. 55.00 including postage and handling. This concessionary rate will be allowed only if the company or institute of the subscriber already subscribes. Separate issues are available. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.
